

Souvik Banerjee

Senior Frontend Engineer

banerjeesouvik018@gmail.com · 8293963041 · Bengaluru, India · LinkedIn · GitHub

SUMMARY

Senior Frontend Engineer with 8+ years of experience building large-scale SaaS platforms, complex product interfaces, and shared developer infrastructure. Proven track record of leading cross-team technical initiatives and delivering shared tooling that accelerates engineering velocity. Actively leveraging agentic workflows and MCP integrations to ship faster and smarter.

EXPERIENCE

Locus Bengaluru · Jan 2021 – Present

Serves 200+ enterprise clients across 30+ countries. Gartner-recognised in 2024 Market Guides for Last-Mile Delivery and Transportation Management. Acquired by Ingka Group / IKEA (Oct 2025).

SDE 3 (Jan 2026 – Present) · Tech Lead (Jan 2025 – Dec 2025) · SDE 2 (Jul 2022 – Dec 2024) · SDE 1 (Jan 2021 – Jun 2022)

- Actively contributed to a **product-agnostic low-code operations platform** from scratch — shared multi-package toolkit (rule engine, i18n, network utils, DateTimeUtils), feature-rich data grid, headless form library with DMN support.
- As a part of the core re-platform team, majorly contributed to shared frontend frameworks and reusable UI building blocks, improving consistency and speed of execution, drove **observability** across products.
- Maintained a strong delivery track record across **multi-year roadmap** execution with consistent quality and reliability.
- Built and owned multiple product dashboards end-to-end — cross-border logistics, real-time fleet operations, warehouse scan and bagging, and shipment management — delivering complex operational flows across each.
- Designed a **self-serve configuration system** used directly by operations teams without engineering involvement; integrated in-app chat, accessibility and internationalisation across products.
- Bootstrapped an experimental React Native warehouse operations web app and made small contributions to the backend services as well.
- Mentored junior and mid-level engineers across teams — through code reviews, architecture discussions, and pairing sessions — contributing to a stronger engineering culture.

Zopsmart Technologies Bengaluru · May 2018 – Dec 2020

A retail-tech platform providing end-to-end tools for e-commerce operations, inventory management, and last-mile delivery planning.

Senior Software Engineer (Oct 2020 – Jan 2021) · Software Engineer (May 2018 – Sep 2020)

- Built frontend modules for retail and e-commerce operations — inventory management, delivery planning, RBAC, and theme-driven storefronts; migrated the customer storefront to **Next.js** with SSR for improved SEO and performance.

MountBlue Technologies Bengaluru · Feb 2018 – Apr 2018

Web Developer Trainee

- Completed an intensive full-stack bootcamp; built production-style applications using React, Node.js, and modern web tooling.

SKILLS

Languages	JavaScript (ES6+), TypeScript, HTML5, CSS
Frontend	React.js, Next.js, Redux, React Query, Storybook, React Native
Platform & Tooling	Micro-Frontend, Monorepo, Design Systems, Component Libraries, Webpack, Vite, Yarn Workspaces
Testing	Jest, React Testing Library, Cypress
AI & Agents	Claude Code CLI, Cursor, LLM-assisted development, Agentic workflows, MCP
Other	Node.js, REST APIs, Git, CI/CD

EDUCATION

B.Tech, Computer Science & Engineering — JIS College of Engineering 2013 – 2017
